EXECUTIVE SUMMARY:

Through my studies, I have been able to gain not only the necessary specific knowledge but also the more **general well rounded formation** that is needed when dealing with international organizations and the processes that regulate them. In the work I have done so far in a highly international environment, such knowledge and attitude have been strengthened every day. In addition, I have learnt to **work in a team, to be proactive** and to improve my **interpersonal skills**. My **relational and communication skills** have benefited from having been exposed to different opinions on a wide range of issues and ideas, as well as my capacity of **analysis, research and writing reports**. Regarding to the work experience in Vienna, following the Permanent Council and the Security Committee meetings of the Organization for Security and Co-operation in Europe (OSCE) I have been able to strengthen my knowledge about the **main international dynamics** within the OSCE area. Followed and reported for two sessions of the Human Rights Council and other meetings of several International Organizations, such as WHO and WIPO.
